

Morgan Hussey

2020 4-H Canada Leadership Excellence Award of Distinction Recipient, Sustainable Agriculture & Food Security

Morgan Hussey has been involved in 4-H since the age of seven. She is a member of the Hill n' Dale 4-H Club in Lunenburg County, NS, and has held many executive positions, including President, Vice President, and Ambassador.

Active on a national level, Morgan was part of her province's delegation at the 2019 4-H Canada Citizenship Congress in Ottawa, ON, plus represented Nova Scotia at the Canadian Young Speakers for Agriculture competition at the Royal Agricultural Winter Fair in Toronto, ON. She has also attended the Encounters with Canada and Forum for Young Canadians youth events in Ottawa.

Outside of the 4-H program, Morgan is very involved in her community. She is a participant in the Duke of Edinburgh's Award program, working on her gold-level award, and also volunteers at Servant's Heart Ministries and other community organizations.

Throughout her high school career, Morgan was involved in the International Baccalaureate program and will be attending Crandall University in Moncton, NB to earn a Bachelor of Business Administration (B.B.A). She also plans to obtain a Masters in Business Administration (MBA), before launching her own company.

Morgan believes that sustainable agriculture and food security are vital to the survival of Canada's population and economy. She plans to keep working toward her goals by continuing with the initiatives she has already created, as well as working toward new ones through research and development.

L.E.A.D. Perspective

"Sustainable agriculture and food security help to support the growth and continuing practice of agriculture by ensuring that there will be a food supply for generations to come. Through my research and development, I believe that if we do not make a change today to sustainable agriculture and food security there will be nothing left for us in the future. If we do not use sustainable farming practices, the impacts on the Canadian food supply and the Canadian economy will be far-reaching with a devastating effect.

"We have to get back to being responsible for ourselves, our land, our farming practices, our food supply, our health, and our future. There is no time like the present to make a change."
